Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Shirley E. Brown and Cecilia Clark provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

Digest

U.S. Exports to Most Markets Rise in FY 1989 (see p. 2). The value of U.S. agricultural exports rose \$4.3 billion to \$39.7 billion in FY 1989 as exports to virtually every major market surpassed year-earlier levels. Japan remained the largest single-country market for U.S. farm products at \$8.2 billion, and the Soviet Union accounted for the largest single increase in export value.

U.S. Imports from Canada and Mexico Reach Record Levels in FY 1989 (see p. 7). Canada and Mexico were the largest suppliers of agricultural commodities to the United States for the third consecutive year in FY 1989. Canada (\$2.8 billion) and Mexico (\$2.1 billion) accounted for 23 percent of U.S. agricultural imports. The nearness of Canadian and Mexican suppliers to the U.S. market helped supplant Brazil as the major agricultural supplier.

U.S. Agricultural Exports to Egypt Approach \$1 Billion (see p. 9). Egyptian efforts to ease food shortages and to import more raw materials could generate \$1 billion of U.S. farm product shipments in 1990. Much of the 21-percent increase to \$955 million in FY 1989 involved bulk items sold through concessional financing. Wheat, cotton, and sunflower oil exports increased sharply. Egypt steeply curtailed purchases of high-value products like frozen poultry and powdered milk in 1989.

U.S. Exports to Most Markets Rise in FY 1989

The value of U.S. agricultural exports rose \$4.3 billion to \$39.7 billion in FY 1989 as exports to virtually every major market surpassed year-earlier levels. Japan remained the largest single-country market for U.S. farm products at \$8.2 billion, and the Soviet Union accounted for the largest single increase in export value. Higher grain prices drove export value higher in many markets. The total volume of U.S. grain exports rose slightly, while oilseed and oilseed product exports fell. The total value of grain and feed exports rose \$4.3 billion to \$16.8 billion, and oilseeds and products value fell \$1.1 billion to \$6.6 billion.

Exports to USSR Climb by \$1.4 Billion

U.S. exports to the Soviet Union jumped 70 percent to a record \$3.3 billion as feed grain exports reached a record 16.5 million tons. The volume of wheat exports declined 40 percent from 1988's record 8.8 million tons, but a substantial increase in prices just about offset the drop in shipments. The value of wheat exports to the Soviet Union was virtually unchanged at \$819 million, while feed grain exports rose 265 percent to \$2 billion. Oilseed and product exports to the Soviet Union rose 1 percent to \$462 million as higher prices made up for decreased volume.

Soviet imports of animal feedstuffs from the United States have been encouraged by an increased emphasis on livestock production in recent years. Economic and political changes in the Soviet Union have resulted in efforts to increase the production and availability of livestock products.

U.S. agricultural exports to Japan rose \$878 million to a record \$8.2 billion in 1989, led by a \$376-million gain in red meat exports. Japan continued liberalizing its beef import policies in 1989, raising beef import quotas. While the 60,000-ton quota increase helped boost U.S. meat exports, sales of nonquota beef and other meats also rose. Sales of U.S. poultry meats to Japan climbed 26 percent; pork, 23 percent; and edible offals, 43 percent.

U.S. feed grain exports to Japan rose \$212 million to \$1.9 billion as higher prices offset a slight decline in volume. The value of oilseed and product exports was virtually unchanged at \$1 billion as lower volume and increased prices just about offset each other. Rapidly

rising meat imports have restrained growth in Japan's livestock sector in recent years, slowing growth in feedstuff imports.

U.S. exports of fruit juices, nuts, and vegetables to Japan were higher in 1989. Shipments of orange juice doubled as import quotas grew in accord with the U.S.-Japan beef and citrus understanding, but other fruit and product sales were unchanged.

Record Exports to China and Mexico

U.S. exports to China grew 143 percent to \$1.5 billion in 1989. Wheat exports increased 42 percent to 8.3 million tons, worth \$1.2 billion, making China the single largest importer of U.S. wheat. Several years of stagnating wheat production, a growing population, and robust economic growth have raised China's demand for imported wheat. The same applies to cotton, and U.S. cotton exports to China climbed from virtually nothing in 1988 to 186,000 tons worth \$234 million in 1989. An increase in the number of small-scale mills near cotton-producing areas also increased the need for imports from overseas by the older, larger mills in coastal areas. As mills in the interior took a larger share of China's domestic cotton production, coastal mills were increasingly forced to rely on imports.

The value of U.S. agricultural exports to Mexico rose \$1 billion to a record \$2.8 billion. Drought-reduced grain and oilseed production accounted for some of the increase, but Mexican efforts to control inflation were far more important to U.S. exports. Since December 1987, the Mexican Government has pursued a relatively successful program aimed at slowing increases in wages and prices. However, as domestically produced supplies of some products fell in response to price controls, imports were increased to sustain consumption. Increases in the value of U.S. exports of red meats, poultry meats, and dairy products to Mexico ranged from 80 percent to 120 percent in 1989. Animal and animal product exports to Mexico rose \$355 million. Grain exports climbed \$352 million, while exports of oilseeds and products increased \$86 million.

Exports to Europe Decline

Exports to the European Community (EC) fell about \$1 billion in 1989, the only major decline in U.S. exports. Export value fell in nearly every major category. U.S. soybean meal exports to the EC fell 60 percent and soybean exports fell 40 percent. Oilseed and product exports declined nearly \$750 million as EC soybean

meal consumption contracted, and the United States lost market share to South America.

Declining markets also included Eastern Europe, Sub-Saharan Africa, Brazil, and Venezuela in 1989. Declines were relatively small, however, with exports to Eastern Europe falling the most of these four. Exports

to Eastern Europe fell \$137 million to \$422 million, their lowest point of the 1980's, as Poland purchased most of its imported wheat from the EC and Yugoslavia in 1989. The U.S. Export Enhancement Program had raised U.S. wheat exports to Poland in 1987 and 1988. (Stephen MacDonald, Commodity and Trade Analysis Branch)

Higher world prices for grains and continued growth in high-value exports helped raise U.S. agricultural exports to most customers in 1989. The \$1.4-billion gain in exports to the Soviet Union amounted to about one-third of the total export value gain. China's and Japan's gains made up 20 percent of the total, while Mexico's reached 25 percent.

U.S. Imports from Canada and Mexico Reach Record Levels in FY 1989

Canada and Mexico were the largest suppliers of agricultural commodities to the United States for the third consecutive year in FY 1989. Canada (\$2.8 billion) and Mexico (\$2.1 billion) accounted for 23 percent of U.S. agricultural imports (table 6). Most of these imports were competitive commodities that are also produced in the United States.

The nearness of Canadian and Mexican suppliers to the U.S. market helped supplant Brazil as the major agricultural supplier. The advantage of proximity most affects shipping live cattle. In FY 1989, live cattle worth \$572 million were imported into the United States, almost exclusively from Canada and Mexico. Large cattle ranches in Coahuila, just across the Rio Grande, supply Texas feedlots with feeder cattle. Canadian slaughter cattle crossed the border into North Dakota from western Canada. Some of the Canadian and Mexican suppliers are closer to U.S. destinations than a competing U.S. supplier.

The Free Trade Agreement between the United States and Canada became law on January 1, 1989. The agreement probably did not have a significant impact on agricultural trade in FY 1989, because of a long transition period in implementing the regulations. The record 1989 U.S. imports from Canada reflect other U.S. demand factors. Yet, January's agricultural imports from Canada produced a record \$297 million.

Canada Leads Farm Products Suppliers

Canada shipped a record \$2.8 billion of agricultural commodities to the United States in FY 1989, 18 percent above the year before and 15 percent above the previous record set by Brazil in FY 1985. Live cattle, fresh beef, fresh pork, malt beverages, and animal feeds and fodders accounted for \$1.13 billion, 40 percent of the total. Livestock and grain products were the primary Canadian exports.

U.S. imports of Canadian agricultural products increased by 46 percent from 1985 to 1989 at a time when the real exchange rate (Canadian dollars per U.S. dollar, adjusted for inflation in both countries) was falling by 15 percent. This suggests that other forces boosted U.S. imports and dominated the negative exchange rate effect.

Canada's diversity in the export market plays a large part in its success. Exports of 29 commodities from Canada exceeded \$10 million, and eight commodities exceeded \$100 million in FY 1989. Canada exports many products to the United States such as cattle (\$373 million), oats (\$108 million), potatoes (\$71 million), apples (\$17 million), and eggs (\$14 million), while Brazil relies chiefly on coffee and orange juice.

Since the mid-1980's, U.S. pork producers have petitioned the International Trade Commission (ITC) to restrain imports of live hogs and fresh pork. The United States imposed periodic countervailing duties on both hogs and pork, with one on pork existing during 1989. Imports of Canadian live hogs (\$103 million) and fresh pork (\$296 million) were well below record levels but still substantial in FY 1989.

Canadian exports of grains and products to the United States have grown substantially. Biscuits and wafers, oats, wheat, barley, pasta, and noodles are the largest import commodities from Canada. Oats imports from Canada have jumped more than tenfold in the past 3 years to 804,000 metric tons in FY 1989. A greater emphasis on higher fiber in the American diet came just as U.S. producers were reducing oats production. Total oats imports in FY 1989 reached 1.2 million metric tons.

U.S. imports of Canadian rapeseed oil and meal were \$145 million in FY 1989. "The granting of GRAS (Generally Recognized as Safe) status in 1985 for low erucic-acid rapeseed oil, commonly referred to as canola oil, opened up the food-use market in the United States."¹ In addition to its new status, the rapeseed oil price was well below the price for competitor oils.

Mexican Sales to United States Top \$2 Billion

Tomatoes, melons, peppers, and cucumbers are the main fruits and vegetables that enter the United States from Mexico, particularly during the winter months. Fresh fruits and vegetables accounted for 40 percent of the \$2.1 billion in Mexico's agricultural sales to the United States during FY 1989. Mexico exceeded \$2 billion in farm products for the first time, making it only the third country to do so (Brazil in FY 1981 and Canada in FY 1987).

¹Oil Crops Situation and Outlook Report, OCS-23, U.S. Dept. Agr., Econ. Res. Serv., Oct. 1989, p. 17.

The real exchange rate (Mexican pesos per U.S. dollar) rose through 1987 before falling in 1988 and 1989, suggesting that other factors dominated the exchange rate effect. Mexico's political decisions placed a greater emphasis on exports since the mid-1980's.

Mexico was one of the few countries to increase the volume of its coffee exports to the United States in FY 1989 (up 91 percent). As a result, the value of Mexico's coffee exports increased by 64 percent to \$464 billion, despite a 14-percent drop in prices. Over half of the total quantity of Mexico's coffee exports to the United States came in July-September 1989.

In early November, the Mexican Government cut in half the tariff on cattle exports, to 10 percent, with the intention of totally eliminating the tariff by September 1992. Mexico exported over 1 million head of cattle to the United States in both FY 1987 and FY 1988. Exports fell to 624,000 head in FY 1989.

Exports of fruits and vegetables, 83 percent fresh, accounted for half of all Mexico's exports to the United States in FY 1989. Mexico has also increased its share in the U.S. import market for frozen concentrated orange juice, from 1 percent in FY 1985 to 12 percent in FY 1989.

Rising sugar prices offset a 22-percent drop in cane sugar exports to the United States in FY 1989. Most of Mexico's sugar sent to the United States is re-exported. Mexico's assigned quota was 7,250 metric tons, but actual shipments were 143,000 metric tons. (Stephen R. Milmo, Commodity and Trade Analysis Branch)

Table 6—U.S. agricultural imports from Canada and Mexico

Fiscal year	Canada	Mexico
<i>Million dollars</i>		
1976	603	632
1977	645	1,014

1988	2,370	1,903
1989	2,785	2,093

U.S. Agricultural Exports to Egypt Approach \$1 Billion

Egyptian efforts to ease food shortages and to import more raw materials could generate \$1 billion of U.S. farm product shipments in 1990. Much of the 21-percent increase in FY 1989 to \$955 million involved bulk items sold through concessional financing. Wheat, cotton, and sunflower oil exports increased sharply. Egypt steeply curtailed purchases of high-value products like frozen poultry and powdered milk in 1989.

Higher 1989 world prices stemming from the 1988 drought in North America and rising Egyptian demand for imported food increased the value of U.S. farm product exports to Egypt. The 1989 value gain reflects substantial hikes in prices for U.S. exports of wheat and oilseed products to Egypt. Wheat accounted for 85 percent of the \$162-million increase in 1988. Wheat and vegetable oil shipments underlie 1989 gains. Egypt wants much larger imports of U.S. corn, cotton, and tobacco, but the shortage of foreign exchange will cause actual imports to lag as shortages worsen.

Record Wheat Exports in 1989

In 1988, U.S. exports of wheat to Egypt increased 14.4 percent and reached 2.8 million tons. The value was up 59 percent to \$372 million, and the average price increased 39 percent to more than \$132 per ton. Combined U.S. exports of wheat and flour to Egypt reached 3.7 million tons in 1988, slightly below the record 3.8 million tons in 1983 when an extra 1.1 million tons of wheat was financed through the Payment-in-Kind, (PIK) program, precursor to the Export Enhancement Program (EEP).

A new record occurred in 1989 as total imports of wheat and wheat flour rose to a 7.3-million-ton wheat equivalent. The initial General Sales Manager (GSM-102) financing for Egyptian wheat and flour purchases of \$170 million was raised to \$350 million for FY 1989, and all the funds were used, mostly in contracts also involving EEP. During FY 1989, U.S. wheat exports to Egypt increased 11 percent to 3.1 million tons, and higher prices, up to \$157 per ton, caused the value to rise 54 percent to \$484 million. During this period, U.S. wheat flour exports declined 26 percent to 615,800 tons, but the average price increased 69 percent to \$205 per ton, pushing the value up 26 percent to \$126 million.

Virtually all U.S. exports of wheat and flour to Egypt moved through various U.S. Government programs in 1988. Title I, P.L. 480 financing provided \$153 million, 31 percent of the \$486.5 million for combined exports of wheat and flour. GSM-102 financing of \$170 million accounted for 35 percent of the total. The EEP underwrote virtually all shipments financed through GSM-102.

U.S. exports of wheat flour to Egypt declined 8.3 percent in 1988 to 662,000 tons, but a 14-percent rise to \$173 per ton raised the value 1.2 percent to \$114 million. Much of the wheat flour was purchased in early 1988 before prices increased sharply, and the average price for wheat flour was less than for wheat and corn, with large purchases in the last quarter of 1988.

Corn Exports Down Sharply in 1988, Drop 6 Percent in 1989

U.S. exports of corn to Egypt declined 48 percent to 1.1 million tons in FY 1988, but the average price rose 28 percent to \$100 per ton. Contributing to the decline were changes in Egypt's corn import situation from steady purchases by a public sector agency, GASC (General Authority for Supply of Commodities), to a mix of imports by several public agencies and private firms in 1987 and removal of the subsidy on imported feed in 1988. Shipments of U.S. corn to Egypt were off more than 80 percent during June-August 1988 from the 1987 level, causing Egyptian output of poultry meat to decline 19 percent in 1988.

Corn exports to Egypt in FY 1989 declined 6 percent to just over 1 million tons, but a 19-percent rise in price caused the value to rise to \$121 million. The strong start for corn exports in early 1989 was offset by the steep decline in shipments after May 1989. Efforts to bolster feed supplies through gains for both domestic production and imports simultaneously caused Egypt to buy more corn from other suppliers, including the EC, Latin America, and Yugoslavia. Imports through grants from USAID (U.S. Agency for International Development) through the Commodity Import Program (CIP) provided some relief from the foreign exchange hurdles to corn imports. Exports of U.S. corn to Egypt through this method of financing averaged more than 400,000 tons during 1984-88. Egypt's corn imports from the EC rose to 151,000 tons in 1988 and may advance further in 1989. Argentina supplied 255,000 tons of corn in 1988 and remains a competitor. Another problem for U.S. corn evolved in 1989 when

port inspectors found small amounts of weed seed in U.S. corn.

Egyptian demand for corn is strong because of rapid hikes in meat prices and a shortage of animal feed. Over 80 percent of the corn supply is now used for animal feed. Domestic producers get about \$200 per ton because of the shortage of livestock products and barriers to imports of corn. Also, most imports of frozen poultry have been banned, forcing market prices for poultry meat to record levels.

Dramatic Gains for U.S. Sunflower Oil In 1989

U.S. exports of sunflower oil to Egypt nearly tripled in FY 1989, rising to 56,600 tons for \$25 million. U.S. sunflower oil exports to Egypt have a lower price because of the Sunflower Oil Assistance Program (SOAP). Egypt purchased 40,000 tons of sunflower oil from the United States on November 15, 1988. This purchase included a contract for 20,000 tons at \$463.50 per ton, another for 10,000 tons at \$470, and two for 5,000 tons each at \$471.

Argentina, however, was the leading supplier of Egyptian sunflower oil during 1985-88. Argentine shipments of sunflower oil to Egypt increased sharply from 105,000 tons in 1987 to a record 181,000 tons in 1988. Argentina is expected to remain the top supplier in 1989, although imports from other suppliers will rise. Total sunflower oil imports may surpass 320,000 tons in 1989, up from 264,000 tons in 1987 and 270,000 tons in 1988.

U.S. exports of cottonseed oil to Egypt increased 4 percent in FY 1989 to 33,000 tons for \$16 million. Brazil remains the major supplier of cottonseed oil imports, providing over 80,000 tons in 1989. A shift to sunflower oil and palm oil has kept imports of cottonseed oil far below 1984-86.

Egyptian purchases of U.S. and EC soybeans declined during FY 1989, but the value rose 30 percent because of higher prices. Soybean meal exports fell 20 percent in FY 1989 to 145,000 tons, but higher prices kept the value decline to 9 percent at \$41 million. Soybean exports declined 16 percent to 66,000 tons in FY 1989,

but the value rose 30 percent to \$21 million, following a 50-percent price rise to \$317 per ton.

Exports of Animal Products Steady in 1988, Decline Steeply In 1989

U.S. exports of tallow to Egypt were steady in 1988 but declined 41 percent to 88,000 tons for \$32 million in FY 1989. Soap factories are using more palm oil and less tallow.

Despite a more than 50-percent decline in exports of frozen chickens in 1988, U.S. exports of frozen turkeys to Egypt nearly quadrupled in 1988, reaching 4,319 tons for \$2.6 million. Egypt banned poultry meat imports during the first 9 months of 1989 and an EEP for 5,000 tons remain unused. The announcement in November that a token 2,000 tons of poultry meat could be imported provided little hope for consumers, with per capita consumption down a third since 1985.

Egypt was a major market for U.S. surplus cheese and butter in the mid-1980's, but no shipments were reported in the past 3 years. As stocks of dairy products in the United States and Europe declined, prices increased and Egypt's imports of milk and cheese declined. U.S. exports of nonfat dry milk to Egypt declined by half in 1988 to 1,138 tons, but the value remained nearly the same at \$1.5 million, when the average price rose to \$1,345 per ton, up from \$731.

Beef liver to Egypt rose 50 percent to 30,000 tons for \$17 million in FY 1989. The average price remained attractive at \$606 per ton in FY 1989. Some beef cuts in Egypt now cost over \$6 per kilogram, 10 times the cost of imported beef liver. Recent barriers related to a foreign exchange shortage, however, have included a regulation that frozen beef liver shelf life cannot exceed 4 months. Despite barriers, imports of U.S. beef liver continue to increase.

Factories Need More Tobacco and Cotton

Egypt's factories need more imported raw materials to operate near capacity. Tobacco stocks are at low levels, and cigarette demand is greater than domestic output. The shift of GSM-102 credit for tobacco and cotton to wheat created financial problems for importers of cotton and tobacco in 1988. U.S. tobacco

exports to Egypt reached a peak of \$76 million in 1985, declined to \$15.8 million in 1986 when credit guarantees were not available, remained steady in 1987, and rebounded to \$24.6 million in 1988 when volume rose by 41 percent to 7,120 tons. Egypt shifted to less expensive suppliers of tobacco in FY 1989, and U.S. shipments were just 160 tons for \$400,000.

Egypt imports short-staple cotton at about half the price received for Egyptian long staple grades which are exported. Egypt's cotton production in the past several years has not been sufficient to maintain export contracts and provide supplies needed by the expanding textile industry. Some mills had to close in August 1989 because of the shortage of cotton. U.S. exports of cotton to Egypt increased 66 percent to 33,000 tons at \$58 million in FY 1989, but a much larger volume was needed. Egypt had another short cotton crop in 1989, and purchases of U.S. cotton increased recently.

Egyptian Ban on Specific Imports Will Hurt U.S. High-Value Products

Egypt could be a market for over \$100 million per year of U.S. high-value products. However, the shortage of foreign exchange is a major barrier. Efforts to cope with the shortage of funds to pay U.S. dollars for imports are often disruptive. Egypt announced that certain luxury items would be banned in early 1989. An earlier ban on imports of fruits and vegetables had already eliminated prospects for U.S. exports of apples and tree nuts to Egypt. Small shipments of almonds continue because of their use by candy factories needing raw materials for increased exports to Mideast markets. About a dozen U.S. commodities, which are now banned, were shipped to Egypt in the early 1980's. These commodities include: frozen poultry, lentils, dry beans, apples, canned fruit, fruit juices, and raisins. (John B. Parker, Developing Economies Branch, Agriculture and Trade Analysis Division)

INDEX OF APPENDIX TABLES

Exports

Table		Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-September 1987/88 and 1988/89, and September 1989	A-4
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-September 1987/88 and 1988/89	A-64
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-September 1987/88 and 1988/89	A-65
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-September 1987/88 and 1988/89	A-66
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-September 1987/88 and 1988/89	A-67

Imports

B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-September 1987/88 and 1988/89, and September 1988 and 1989	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-September 1987/88 and 1988/89, and September 1989	B-4

Prices

C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

Are we approaching a world food crisis?

That's the question addressed in a new report from the Economic Research Service. The question is raised by a confusing array of facts. Most of the world's good farmland is already in production, nearly all the available irrigation water has been tapped, and groundwater supplies are shrinking. **If world population stabilizes sometime around the end of the next century (as currently projected), the world should have enough nonrenewable resources, such as land, water, and energy, to feed a growing population at a gradually improving standard of living.** But these resources are unevenly distributed, resulting in often prolonged, though localized, shortages. And although world food production per capita continues to increase, it's doing so at a slower rate.

Order your copy of this vital report now. With it you can sort out and put into perspective the recent spate of "no-hope, new-hope" news articles on our world's potential to feed itself.

Read the recent special issue of World Agriculture, an ERS publication...In a scholarly 75 pages by its own specialists, it tackles such subjects as "Famines Past and Famine's Future" ... "Environmental Degradation of Agriculture" ... "Climate Change and Agriculture" ... "Short-Term World Food Security" ... "Technology: Are We Running Out of Steam?" and more.

—From *USDA Executive Notes*, Aug. 1989

This report costs \$5.50 domestic and \$7.00 foreign (includes Canada). To order your copy, call toll-free, 1-800-999-6779, and ask for *World Agriculture, SPECIAL ISSUE*, WAS-55. Or send check or money order to ERS-NASS, P.O. Box 1608, Rockville, MD 20849-1608. Your order will be sent by first-class mail.
